Compared to last week's market, feeder steers and heifers weight price averages ended fully \$5 to \$8 lower with certain lower class instances up to \$10 lower. Slaughter cows gained ground and finished \$2.50 higher while the slaughter bulls remained steady. Buyer demand continues to remain good with caution being given to animal quality.

Even with the futures board closing higher today a dark cloud could be showing up on the horizon in the form of increasing drought in both the grazing country and corn belt. Higher input cost along with runaway inflation could also weaken demand.
