

## CSI Data Quality Improvement

### Webinar #19: Pre-submission validation and soft submissions before committing data

**Summary:** Several counties have called for DHCS to create a pre-submission validation checking tool that can be used before committing data. Also, DHCS may consider creating a “Save as Draft” button which commits the information to an interim table without necessarily running all validations and committing to the database. This webinar can act as a brainstorming session for the creation of the pre-submission validation checking tool.
